I am a dedicated Front-End Developer with a strong desire to contribute to the technology industry. My skills include HTML, CSS, Tailwind, JavaScript, TypeScript, React, Redux Toolkit, React Query, React Hook Form, and Next.js.

WORKING EXPERIENCE

Solusi Infotech Semesta Indonesia, Bandung

Oktober 2024 – Now

Frontend Developer

- Contributed to the development of SIM DPP BAZNAS, an internal system for recording zakat distribution and mustahik data.
- Assisted in developing business-oriented web applications for Universitas Malang, aimed at supporting the university's operational and administrative needs.
- Contributed to the development of SatuWakaf, a digital platform designed to facilitate and manage charitable endowment (wakaf) activities.
- Contributed to the development of Travelqu, a halal travel booking platform for managing umrah, hajj, and religious trip reservations.
- Conducted product demos and collaborated directly with clients to gather feedback and refine user experience.

Data Integrasi Inovasi, Jakarta

January 2024 – April 2024

Frontend Developer

- Developed a fully functional HRIS to manage and track employee performance reviews, ensuring that 100% of reviews were completed on time and improving compliance with company policies.
- Collaborated closely with the development team to convert UI/UX designs into responsive, functional code with pixel-perfect accuracy, and troubleshoot as well as resolve bugs across various applications to maintain optimal functionality and user experience.
- Expertise in leveraging advanced frontend technologies including Next.js, React Query for efficient data fetching, React Hook Form for scalable forms management, and TypeScript for robust type-checking, enhancing application scalability and maintainability.

Fly Tech Indonesia (Internship), Malang

November 2023 – December 2023

Frontend Developer

- Specialized in building interactive and visually appealing websites using Next.js, focusing on optimal user experience and responsive design.
- Proficient with Next.js for scalable web applications, styled using Tailwind CSS for utility-first efficiency, and enhanced with DaisyUI for consistent and customizable UI components.

PERSONAL PROJECTS

Chat App

Fullstack

- Implemented live chat functionality, allowing users to send and receive messages instantly without page refresh. Using Next Cloudinary for implementing image uploading and sharing.
- Integrated image upload and sharing, enabling users to send images along with text messages within the chat.
- Developed the chat application using Next.js, React, and Prisma, incorporating real-time messaging with Pusher and styling with Tailwind CSS.

Spotify Clone

Frontend

- Developed a music playback feature similar to Spotify, enabling users to play songs, with integration of album displays linked to the user's account.
- Implemented dynamic album retrieval using Spotify Web API to fetch and display albums and tracks

associated with the authenticated user's account.

- Built using Next.js with TypeScript, utilizing Redux Toolkit for state management, React Query for fetching and caching, and Framer Motion for smooth animations. Styled with Tailwind CSS.

Todo List

Frontend

- Implemented CRUD (Create, Read, Update, Delete) operations, allowing users to add, edit, and delete tasks easily within the app.
- Developed with Next.js and TypeScript for full-stack functionality, Prisma as the ORM, and PostgreSQL as the database. Used Tailwind CSS for responsive design and Redux Toolkit for state management.

EDUCATION

Universitas Diponegoro, Semarang

August 2019 – 6 June 2023

Bachelor of Economy, Management

GPA 3.47 of 4.00

CERTIFICATIONS

Winner of Best Final Project Team, Rakamin

August 2023

Made the application that wins the final assignment - Year 2023.

TRAINING

Fullstack Developer, Rakamin

March 2023 – August 2023

- Trained in building user interfaces using React and Next.js, focusing on creating dynamic and responsive web applications.
- Learned how to design databases, develop APIs, and integrate frontend applications with backend services for seamless data communication.

React and React Native Basics, Hactiv8

August 2022 – December 2022

- Gained a solid understanding of React for building responsive web interfaces, with a focus on implementing user-centric features and components.
- Learned the fundamentals of React Native for developing cross-platform mobile applications, adapting web concepts to mobile-specific use cases.
